(a)
Zeta degree / Pareto threshold
(b)
Zeta degree / truncated Gaussian
(c)
Poisson degree / Pareto threshold
(d)
Poisson degree / truncated Gaussian
mean threshold $\bar{\phi}$
mean degree $z = \langle k \rangle$
$\gamma_{\text{th}} = 2.05$
$\gamma_{\text{th}} = 2.1$
$\gamma_{\text{th}} = 2.25$
$\gamma_{\text{th}} = 3$
$\sigma = 0.1$
$\gamma_d^* = 3.479$
$\gamma_d = 2.5$
